released: November 16, 2022-- new statistics for 2021; revised statistics for 2010-2020.

Per capita personal income is total personal income divided by total midyear population estimates. BEA produced intercensal annual county population statistics for 2010 to 2019 that are tied to the Census Bureau decennial counts for 2010 and 2020 because this data was not published when Census released county population data for 2020 and 2021, which are based on the 2020 decennial counts, and will be used until Census releases its official intercensal population data.
